

# THE POWER OF PROPHYLAXIS

Three webinars to increase awareness of modern prophylactic treatment options in hereditary angioedema and why and how we should use them. The overall aim of this webinar series is to make colleagues aware of the burden that is linked to hereditary angioedema and the need for patients to control their disease. We will review the aims of treatment of hereditary angioedema and how to use patient-reported outcome measures to make sure that the aims are achieved. Primary we will look at modern treatment options and how they provide control of hereditary angioedema.
